WOOD

GRADE 0000:

Polishing waxed wood. Smoothing matt finish for highly polished wooden surfaces. Removal of water stains on waxed wood.

GRADE 1:

Sanding and polishing wood surfaces after priming and before applying first coat of paint.

GRADE 2:

Spreading wax on wood and stone floors in a thin even layer.

GRADE 3:

Sanding primed wood, accentuating the surface's natural structure.

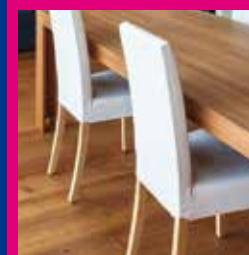

GRADE 5:

Removal of stain residue on wooden surfaces after stripping.

GRADE FINE:

Sanding grained wood such as unprotected parquet flooring or wooden tables.

EXTRA FINE GRADE:

Polishing wood containing tannic acid, e.g. mahogany, oak timber and nutwood.

COLOUR

GRADE 000:

For intermediate sanding of varnished or shellac-coated surfaces.

GRADE 1:

Removal of old varnish from antiques, in combination with a varnish remover.

GRADE 5:

Roughening old painted surfaces before application of new paint. Cleaning glass tiles and other glass surfaces without scratching.

GRADE MEDIUM:

Removal of stain residue after stripping heavily-grained wood.

MEDIUM GRADE:

Achieving perfect wooden surfaces – especially in outdoor areas.

METAL

GRADE 000:

Gives copper and brass items a bright shine.

GRADE 0:

Cleaning of copper pipes and fittings before soldering.

GRADE 4:

Removal of stubborn dirt from corners and edges, and of superficial rust, oil, limescale and hard water deposits.

GRADE VERY COARSE:

Removal of rust from metal surfaces in combination with solvent.

FINE GRADE:

Removal of grease, grime and crusty residue. Rust-free cleaning of wet surfaces.

CLEANING

GRADE 00:

Removal of grease and dirt from plastic blinds and aluminium window frames. Cleaning glass surfaces and mirrors.

GRADE 0:

Removal of dirt and heel marks from linoleum and rubber flooring.

GRADE 2:

Cleaning glazed and plastic tiles.

GRADE 4:

Removal of persistent dirt from corners and angles.

GRADE 5:

Cleans glass bricks and tiles reliably and scratch-free.

GRADE FINE:

Removal of coarse dirt on stone and ceramic surfaces

COARSE GRADE:

Taking off heavy dirt – also in combination with chemical products.

Premium Quality Made in Germany

RAKSO Steel Wool is made from special, high-grade steel. It has a high purity, high breaking strain and is extremely elastic.

Premium Quality Guaranteed

The Scale of Hardness indicates where RAKSO Steel Wool can be used to gently sand, softly polish and clean without scratching.

Grade of hardness	Material	Surface	Scale of Hardness (according to Mohs)
10	Diamond		
9	Emery paper	Earthenware	
8	Non-woven abrasive	Glass ceramic	
7		Porcelain	
6	Glass paper	Window glass	
5		Enamel	
4	RAKSO STEEL WOOL	Hard metals	
3		Hard plastics	
2			
1		Wood	
		Acrylic Paint	
		Plaster boards	

Cleans, treats without scratching

Smooths, sands

Reliable grading:
Guarantees efficient surface treatment.

Elastic and flexible:
Guarantees easy treatment of profiles.

Ecological:
Guarantees environmentally sustainable manufacturing and disposal.

Informative Packaging

STAINLESS STEEL WOOL EXTRA FINE FINE MEDIUM COARSE Scan and see for yourself how to achieve perfect wooden surfaces with RAKSO Stainless Steel Wool.
---	--	--	---	--

Packaging should be informative. That's why all RAKSO packaging features easy-to-understand instructions. Of course, it also comes with a unique **barcode (GTIN)**, the **net weight** and a **Green Dot**.

Unique Application

Polishing without scratching:
Extra fine Steel Wool fibres treat surfaces with a "razor blade" effect.

Enhances structure of wood:
Wood's natural grain is accentuated after priming.

Gentle treatment:
Rather than grinding down a surface, it carefully sands down paint coatings – ensuring base coats remain undamaged.

Glass, tiles and ceramics:
Even delicate surfaces like glass can be cleaned without scratching.
